

2018-19
Knowledge
Assessment
Results

North Central Region

Center for FSMA Training, Extension
and Technical Assistance

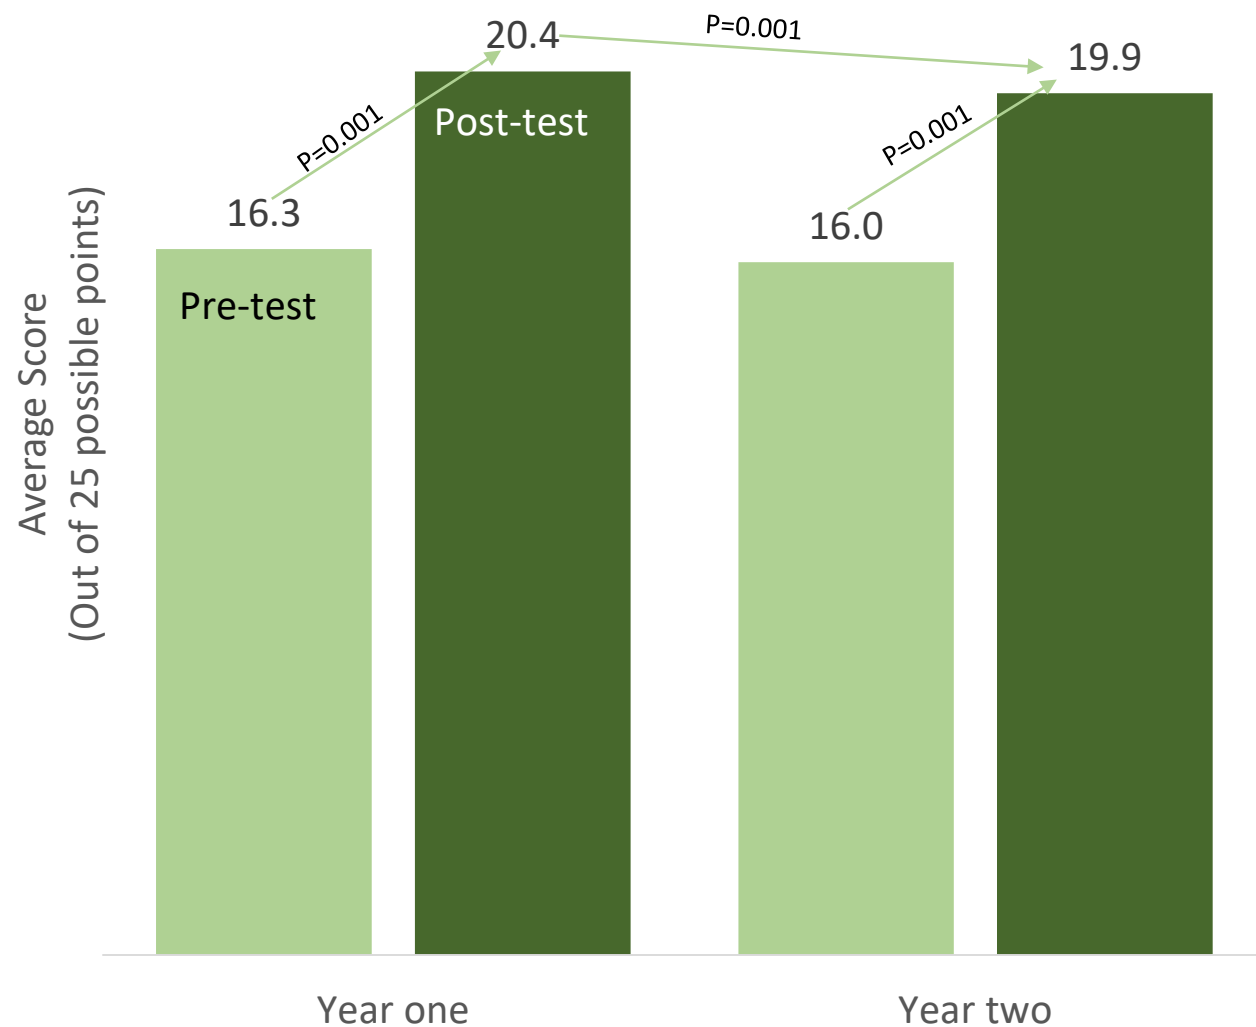

Year 2
knowledge
assessment
participation

93 trainings from 10 states

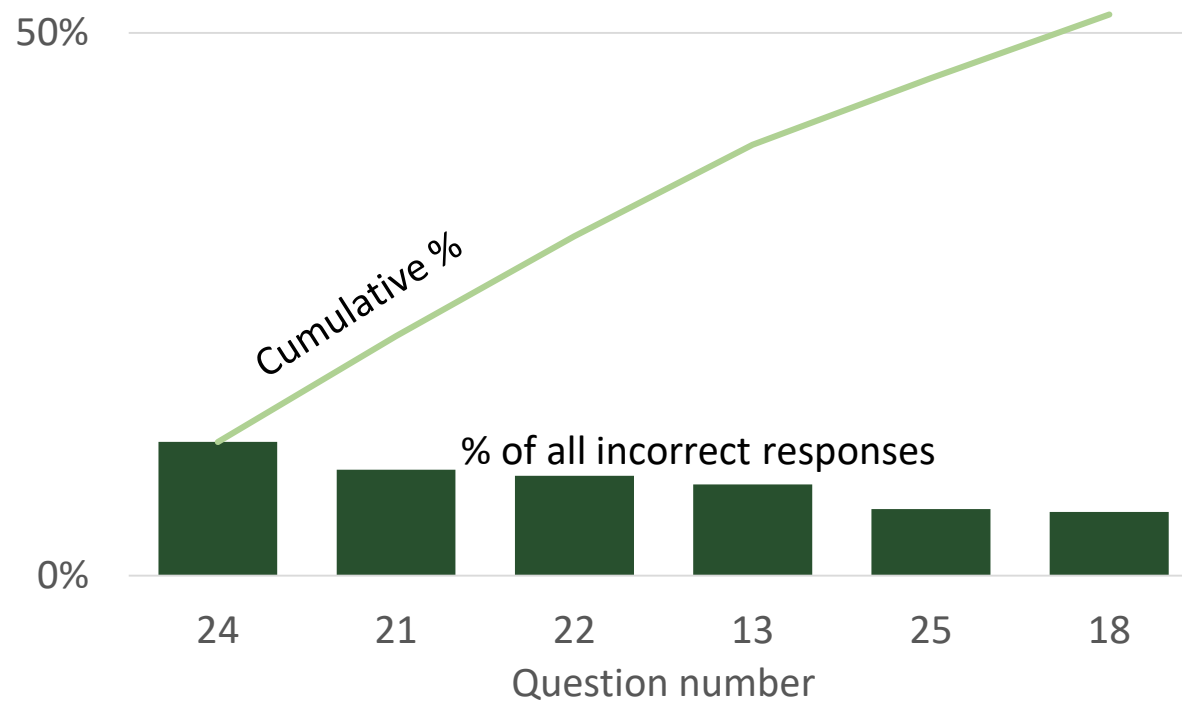

21 trainings targeted special populations

1519 complete responses

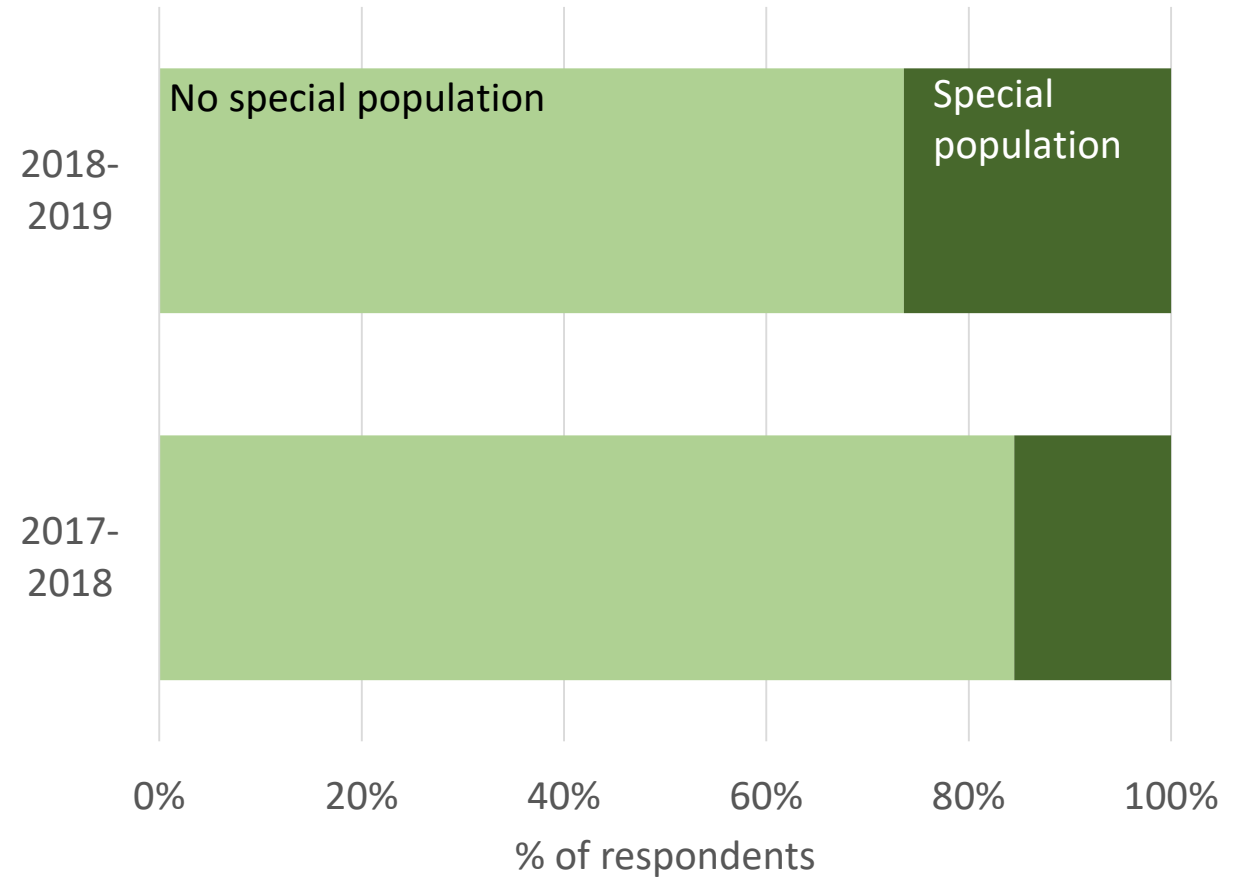

Knowledge increase was statistically significant in both years.

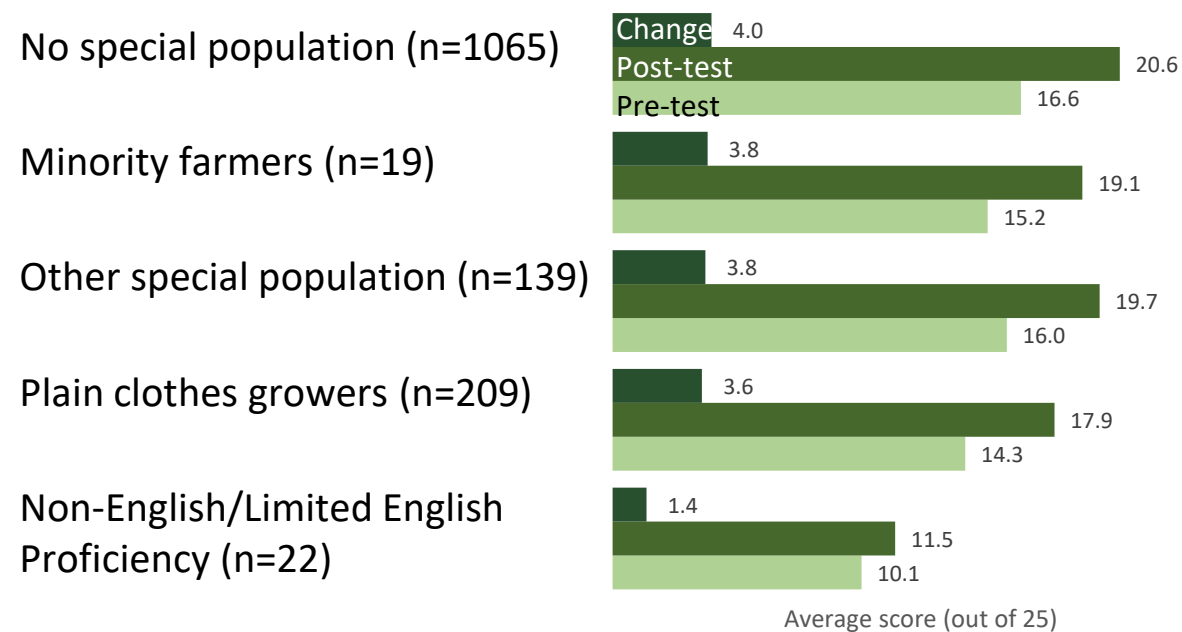

The same problem questions from year 1 persisted in year 2.

Year 2 trainings reached more people from special populations.

Special populations did not score as well as non-special populations.

State reports

Will be sent out after today's listening session.
(Except Indiana may be next week.)

Follow-up survey

The plan

Each state has the option to add one or two state specific questions. I will need to know your questions by **January 6**.

Can send electronically or on paper (NCR FSMA will print).

You need to collect email and/or physical addresses.

Send during week of **January 20**.

Responses due **February 28**.

Each state will receive a report in late spring.

Let's review the questions...

I need to know
from you:

Are all the trainings you held between July 1, 2018 and June 30, 2019 listed?

Will you add a question specific for your state?

Which agency is conducting inspections in your state?

Do you need to send paper copies? How many?

Do you need it translated into another language?
