

Objective: Build a lasting space for all states in the NCR to discuss issues/successes with managing data related to the PSR

Conclusions:

- Interest is high for more communication/cooperation between state agencies
- The end of the CAP agreement in June 2021, leaves states 1.5 years to verify the farm inventory and establish annual verification and data management practices
- Establishing shared practices for data collection and management will ensure better consistency for state and national reporting program evaluation and development
- To accomplish goals, we need to foster **active & lasting** partnerships in the region
 - Get states talking to each other
 - Keep that communication frequent
- NCR is willing to support us in this effort

Building Regional Partnerships for Data Management

Lebo Moore and Lillian Otieno– Minnesota Department of Agriculture

Proposal:

- 3 zoom meeting this summer for state employees managing farm inventory and inspections data systems
- Coordinate with established monthly regulator call

NCR Staff will assist by:

- Setting-up Zoom meetings
 - Acting as moderator/note taker for discussions
 - Storing notes & a working FAQ on Food Shield
- **Tentative 1st Zoom Meeting: Date TBD**
 - Topic: Share States Farm Inventory and Inspections data systems
